None	Not applicable	Not applicable	Not applicable

5. Allergies

Allergen	Reaction	Severity
No known drug allergies	Not applicable	Not applicable

6. Visit notes — vascular surgery

Visit date: May 12, 2026 | **Attending:** James Whitfield, MD, RPVI | **Type:** New patient consult

Chief complaint. Spider veins on both thighs. She wants them injected before a September wedding.

History of present illness. Claire Nguyen is a 35-year-old accountant. She is bothered by clusters of spider veins on the front of both thighs. She denies aching, swelling, itching, ulceration, bleeding, and thrombophlebitis. The appearance is the only concern. Symptoms do not interfere with activities of daily living. She has never worn compression for a medical reason. She walks without limitation. She has no history of vein thrombosis.

Examination.

Blood pressure 118/72 mmHg	Skin Telangiectasias and reticular veins on both anterior thighs. No bulging varicose veins.
CEAP C1 both legs. Asymptomatic.	Edema None
Ulcer None	

Assessment and plan.

Cosmetic telangiectasias, CEAP C1, asymptomatic. No axial symptoms.

Duplex was completed to be sure there is no hidden saphenous reflux. There is not.

She still wants sclerotherapy of the spider veins. Order injection of sclerosant for spider veins of both thighs.

Electronically signed: James Whitfield, MD, RPVI — May 12, 2026 at 11:05 AM

7. Diagnostic reports

Venous duplex reflux study — May 6, 2026

Ordering physician	James Whitfield, MD, RPVI
Facility	Gulfshore Vascular Lab
Indication	Spider veins, rule out saphenous reflux
Technique	Upright duplex

Interpretation. Both great saphenous veins are competent. Reflux time at each saphenofemoral junction is 0.3 seconds, which is not pathologic. Great saphenous diameter is 2.4 millimeters on the right and 2.2 millimeters on the left. Both small saphenous veins are competent. Reticular veins in the thigh measure up to 1.5 millimeters. Impression: no saphenous reflux. Findings are limited to telangiectasias and reticular veins under 3 millimeters. CEAP C1.

Electronically signed: Elena Vasquez, MD, FACS — May 6, 2026

8. Planned procedure

Planned procedure	Injection of sclerosant for spider veins of both thighs
CPT	36468 — injection of sclerosant for spider veins (telangiectasia), limb or trunk
Laterality	Bilateral thighs
Indication stated by patient	Appearance before a wedding. No pain and no swelling.
Surgeon	James Whitfield, MD, RPVI
Payer	Florida Blue BlueOptions PPO
Authorization status	Not submitted. Request dated May 12, 2026.

Clinical indication summary

CEAP C1 telangiectasias. Asymptomatic.

Patient denies aching, swelling, itching, ulceration, bleeding, and thrombophlebitis.

Duplex May 6, 2026: saphenous reflux 0.3 seconds, diameters 2.4 and 2.2 millimeters. No saphenous reflux.

Ordered code is 36468.
