PATIENT MEDICAL CHART

CONFIDENTIAL — FOR AUTHORIZED USE ONLY. All names, addresses, member IDs, and clinical facts are fictional and were created for demonstration. This is not a real patient.

1. Patient demographics

Patient name	Frank Doyle
Date of birth	October 10, 1960
Age at visit	64 years
Sex	Male
MRN	PAD-31990
Address	6 North Willow Avenue, Tampa, FL 33606
Phone	(813) 555-0184
Emergency contact	Joan Doyle (spouse), (813) 555-0185
Primary care	Dr. Lila Ortega, MD, (813) 555-0120
Preferred language	English

2. Insurance

Primary insurance

Payer	Florida Blue, BlueOptions PPO
Member ID	XFB7730012
Group	FL-1888
Prior authorization	Staff note says ask whether an auth is needed. No auth has been opened.
Auth telephone	1-800-555-0194

Secondary insurance. None on file.

3. Active problem list

ICD-10	Diagnosis	Onset	Status
I70.212	Atherosclerosis of native arteries of extremities with intermittent claudication, left leg	2025	Active, code entered by the medical assistant
I73.9	Peripheral vascular disease, unspecified	2025	Active, duplicate of the line above
F17.210	Nicotine dependence, cigarettes	1998	Active

4. Current medications

Medication	Dose	Frequency	Indication
Aspirin	81 mg	Daily	Entered from a pharmacy list. Adherence not confirmed.

Medication	Dose	Frequency	Indication
Atorvastatin	20 mg	Daily	Hyperlipidemia, no lipid panel in this chart

5. Allergies

Allergen	Reaction	Severity
Contrast dye	The August note says no known allergies. The September addendum says hives. Unreconciled.	Unknown

6. Visit notes — vascular surgery

The notes below disagree with each other. They are printed in chart order, including an unsigned addendum.

Visit date: August 4, 2025 | **Attending:** Priya Raman, MD, FSVS | **Type:** New patient consult

Chief complaint. Mild left calf discomfort on long walks.

History of present illness. Frank Doyle is a 64-year-old electrician. He says his left calf feels tight after about four blocks, not after one block, and only when he is carrying a ladder. He has not missed work. He has no rest pain and no ulcer. He smokes half a pack daily. The discomfort does not significantly limit employment. He is here because a screening ABI was mentioned at a health fair, but the health-fair number is not in this chart.

Examination.

Blood pressure 150/88 mmHg	Left ABI in this note 0.88, measured in clinic with a handheld Doppler
Right ABI in this note 1.04	Foot No ulcer. Pulses diminished but present on the left.
Walking Symptoms after four blocks. He finishes his workday.	

Assessment and plan.

Mild claudication. ABI 0.88 on the left in this note.

Advice to walk more was given. No structured program with a start date was prescribed. No follow-up interval for a twelve-week trial was set.

CTA is ordered. No procedure is named.

Electronically signed: Priya Raman, MD, FSVS — August 4, 2025 at 4:45 PM

Addendum — September 2, 2025, entered by Alex Kim, medical assistant. Not signed by a physician.

Patient called. States the leg is worse. I wrote ABI 0.54 in the telephone note. The note does not say which leg, and it does not say the test was repeated. Dr. Raman was not on the call. Task list entry the same day, copied here without editing: auth for stent?? ask Dr. Raman.

There is no physician signature on the September 2, 2025 addendum.

7. Diagnostic reports

CTA runoff — September 12, 2025

Ordering physician	Priya Raman, MD, FSVS
Indication	Leg discomfort. The order does not restate a percent stenosis.
Allergies on the radiology form	No known contrast allergy, which conflicts with the September addendum

Interpretation. Left superficial femoral artery: 55 percent stenosis in the mid thigh. Popliteal artery is patent. Iliac arteries are patent. Right leg has no stenosis over 30 percent. Impression: 55 percent stenosis of the left superficial femoral artery. This is not a 70 percent stenosis and it is not an occlusion.

Electronically signed: Bayshore Imaging — September 12, 2025

8. Planned procedure

There is no signed procedure order. The scheduling comment, entered by the medical assistant on September 16, 2025, reads: Schedule LLE angio plus or minus stent. No CPT code has been selected. The attending has not signed an order for stent placement. CPT 37226 does not appear anywhere in this chart. HCPCS C9765 does not appear anywhere in this chart.

August 4, 2025 physician note: left ABI 0.88, symptoms after four blocks, no procedure ordered.

September 2, 2025 unsigned addendum: ABI 0.54 with no laterality and no repeat test.

September 12, 2025 CTA: 55 percent stenosis of the left superficial femoral artery.

Scheduling comment only: left leg angiogram with possible stent. No CPT.

This document is for clinical and administrative demonstration only. Patient identifiers are fictional.
